当意式美学与现代生活习惯融合，看似随意的布置其实都是精心设计。为四面通透玻璃柜，将内部结构从传统板式中抽离，以多层格的设计呈现，玻璃的通透明亮，井然有序的物

品摆放，使整体实用性与艺术感相得益彰。

玻璃柜最大特点为多变式的组合结构，可作为客厅展示柜、酒柜，亦可通过配件的搭配，作为卧室玻璃衣帽柜，同时它还有个优点就是其柜门与多款铰链互通，适配市面上的多款铰链，区别于其它只能用单款铰链的柜门。

When Italian aesthetics merge with modern lifestyles, the seemingly effortless arrangement is in fact meticulously curated. The four-sided transparent glass cabinet reimagines traditional panel-based construction through its multi-tiered shelving system. The crystalline clarity of glass combined with neatly organized displays creates perfect harmony between functionality and artistic sensibility.

The cabinet's standout feature lies in its versatile modular configuration. It effortlessly transitions between roles as a living room display case, wine cabinet, or even a bedroom glass wardrobe through accessory customization. Furthermore, its door system demonstrates exceptional compatibility, designed to work with most market-available hinges—a distinct advantage over competitors limited to single-hinge solutions.

是铝框结构玻璃柜系统，其顶板、底板均为木板材质，侧板、背板可以选择木板材质和玻璃材质，整个柜子也可选择只有前立柱或者只有后立柱的开放式立柱挂臂系统，也可以两者搭配，即外侧栅为木板材质或玻璃材质，中间侧栅只有前立柱或者只有后立柱，打通了封闭式柜体与开放式柜体的壁垒，可以实现两者的无缝转换。

它的多功能性能根据不同的场景用不同的方式，内部结构具有模块化的灵活变动，是一款功能强大的玻璃柜系统。

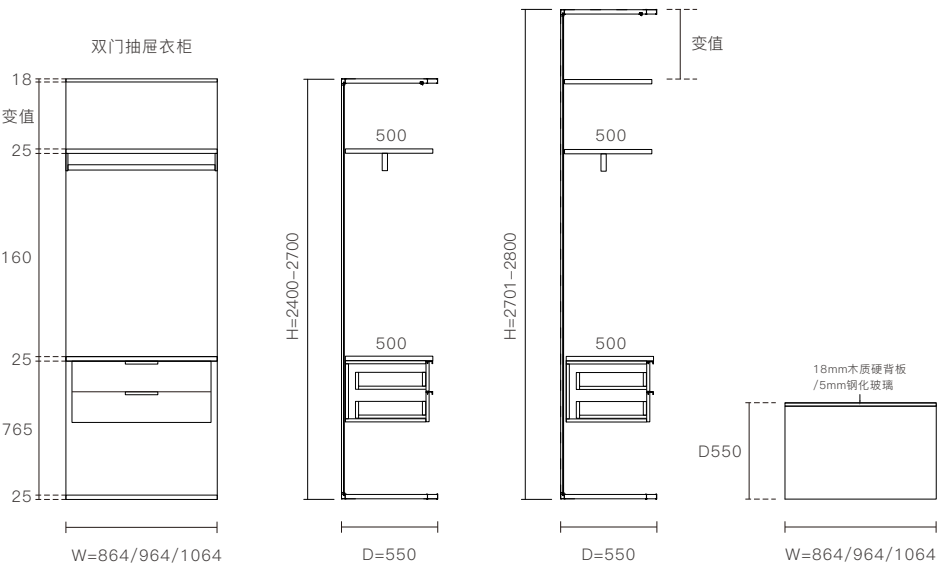

The system is an aluminum-framed glass cabinet architecture where top/base panels maintain wood construction, while side/back panels offer material flexibility between wood and glass. Its innovative column mounting system provides three configuration modes: front-column-only open design, rear-column-only setup, or hybrid arrangements combining wood/glass exterior grids with selective front/rear central columns. This structural ingenuity bridges the divide between enclosed and open cabinet formats, enabling seamless transition between both paradigms.

Engineered for versatile performance, the system adapts to diverse scenarios through modular flexibility in its internal framework, establishing itself as a supremely functional glass cabinet solution.

模块化 Modularity

工艺说明:

①柜体:

- (1) 璃柜可以选择全部侧板是铝栅结构，通体玻璃铝栅仅能应用于柜体左右最外侧，只有无玻璃的铝栅能应用于所有侧栅；所有侧栅底部前后均有调节脚，调节范围为5-16mm；侧栅前面型材竖打光，层板前下打光，灯线可选：1) 在侧栅后型材内走线，2) 层板触点取电；顶底板材质是25mm木板，顶板可配嵌入式灯条，顶底板前端和后端均配铝横梁；背板材质可选木板、木板包皮、木板包布、玻璃；2400mm≤柜体高度≤2800mm，深度350mm/550mm；
- (2) 璃柜可以选择有前立柱（即为侧栅前型材）的开放式立柱前挂臂系统，形成立式衣帽间；立柱顶天立地，底部有调节脚，初始值为10mm，可调节范围±5mm，顶部有固定安装码；立柱竖打光，顶部走线；支臂挂在前立柱后面；
- (3) 璃柜可以选择有后立柱（即为侧栅后型材）的开放式立柱后挂臂系统，形成护墙式衣帽间；立柱固定在墙面，顶天立地，底部有调节脚，调节范围为5-16mm，顶部有固定安装码；背板通过型材卡在后立柱的卡槽内，与后立柱齐平；支臂挂在后立柱前面；
- (4) 璃柜可以选择以柜体混搭的方式，侧栅选择铝栅结构，在侧栅型材上装上支臂型材，把侧栅横梁改成悬挂支臂，随之中间几个侧栅采用只有前立柱或只有后立柱的结构，实现封闭的柜体和开放式柜体的丝滑转换；

②门板:

- (柜体1) 设计为无门柜，也可以设计为带门柜，门板能搭配“萨利切”系列玻璃门板、“亚萨”系列玻璃门板、“LK”系列门板、“百灵”系列玻璃门板；门板宽度300mm≤W≤550mm，高度=柜体高度-4mm；
- 注：“萨利切”系列门板最大可以做1.3㎡，超宽门板需使用“重型萨利切”系列门板；
- (柜体1和2混搭) 设计为无门开放式柜，也可以设计为带门柜，门板能搭配“亚萨”系列玻璃门板、“LK”系列门板、“百灵”系列玻璃门板；门板宽度300mm≤W≤550mm，高度=柜体高度-4mm。

Process Description:

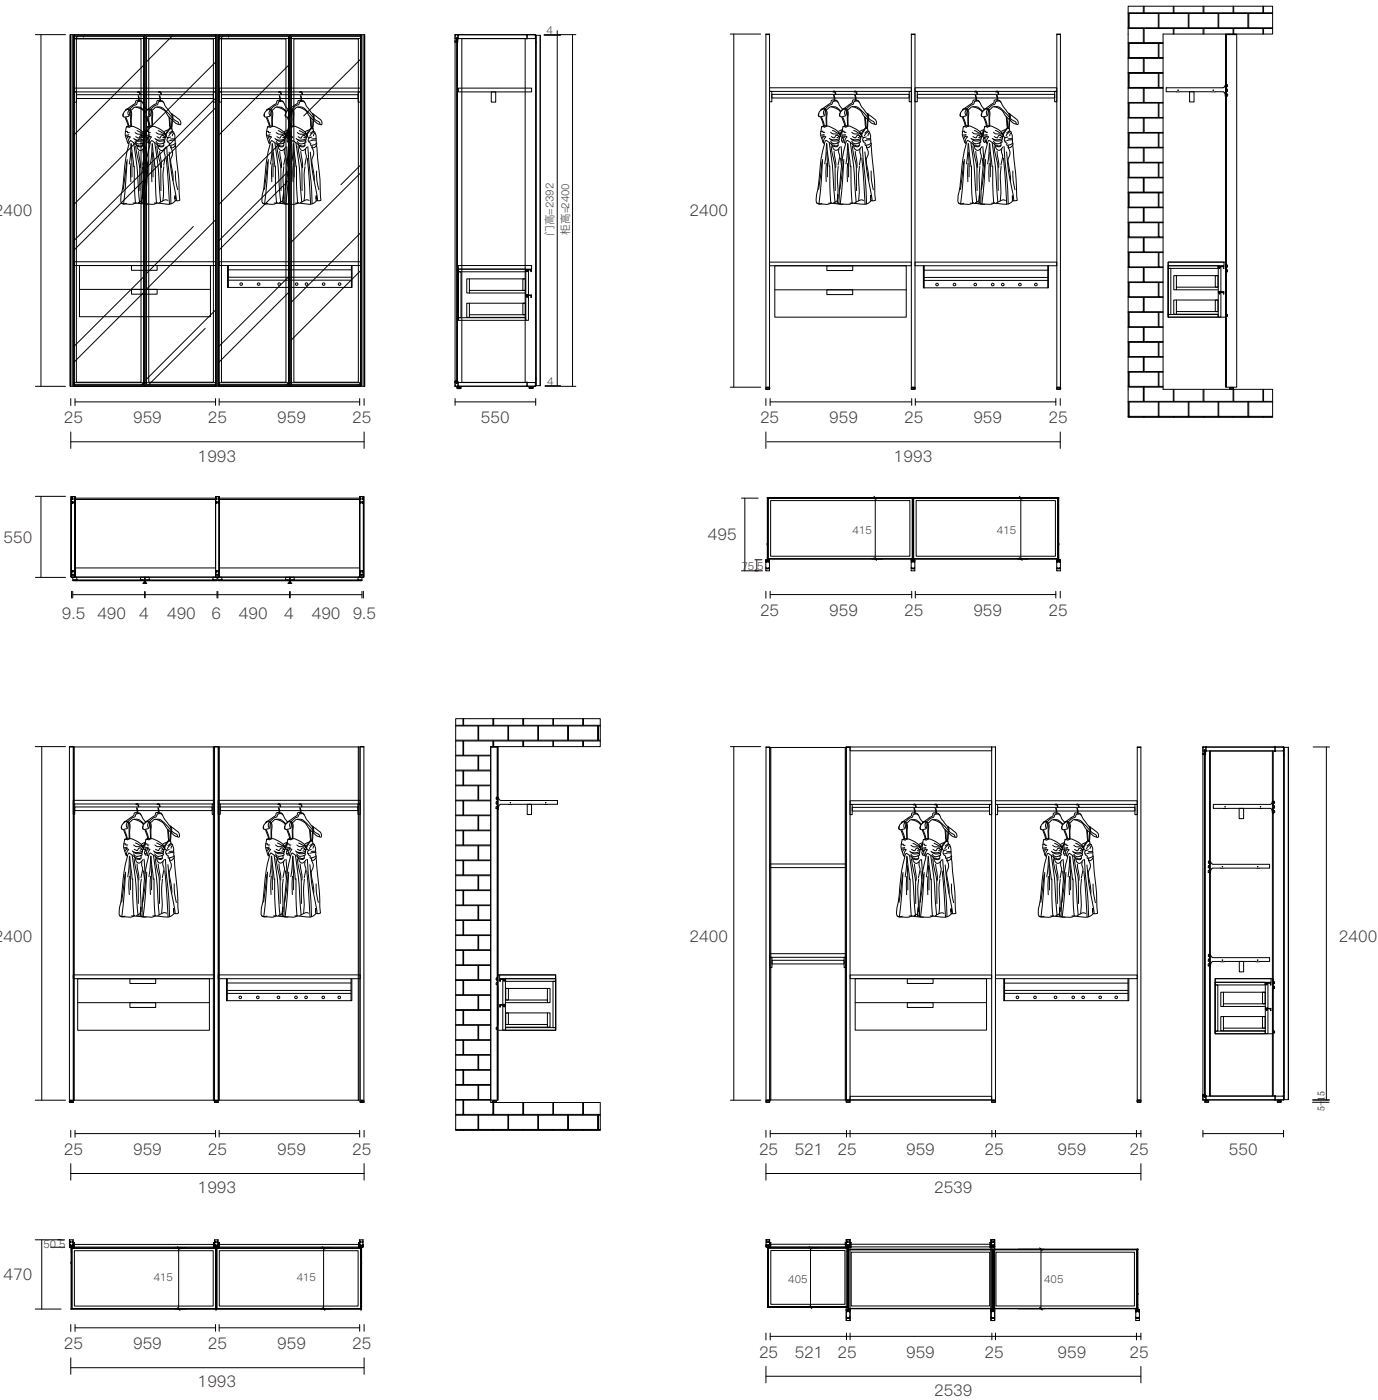

① Cabinet Body:

- (1) Ari glass cabinet can be configured with all side panels as aluminum grid structures. Full-glass aluminum grids can only be used on the outermost left/right sides of the cabinet body; glass-free aluminum grids can be used for all side grids. All side grids have leveling feet at front/rear bottom with 5-16mm adjustment range. Front profile of side grid has vertical lighting; front underside of shelf has lighting. Wiring options: 1) Run wires inside rear profile of side grid, 2) Contact power supply from shelf. Top/bottom panels are 25mm wood panels. Top panel can be equipped with recessed light strips. Both top/bottom panels have aluminum beams at front/rear ends. Back panel options: wood panel, leather-wrapped wood, fabric-wrapped wood, or glass. Cabinet height: 2400mm ≤ H ≤ 2800mm. Depth: 350mm/550mm.
- (2) Ari glass cabinet can be configured with front posts (front profile of side grid) for an open front-post hanging arm system, creating a vertical walk-in closet. Posts extend floor-to-ceiling with leveling feet at bottom (initial height 10mm, ±5mm adjustment range) and fixed mounting brackets at top. Posts feature vertical lighting with top wiring. Arms hang behind front posts.
- (3) Ari glass cabinet can be configured with rear posts (rear profile of side grid) for an open rear-post hanging arm system, creating a wall-mounted walk-in closet. Posts are wall-fixed and extend floor-to-ceiling with leveling feet at bottom (5-16mm adjustment range) and fixed mounting brackets at top. Back panel locks into slots of rear posts via profiles, flush with posts. Arms hang in front of rear posts.
- (4) Ari glass cabinet can be configured with hybrid cabinet body: Side grids use aluminum grid structure. Install arm profiles on side grid profiles, replacing side grid beams with hanging arms. Intermediate side grids adopt front-post-only or rear-post-only structures, enabling seamless conversion between enclosed and open cabinets.

② Door Panels:

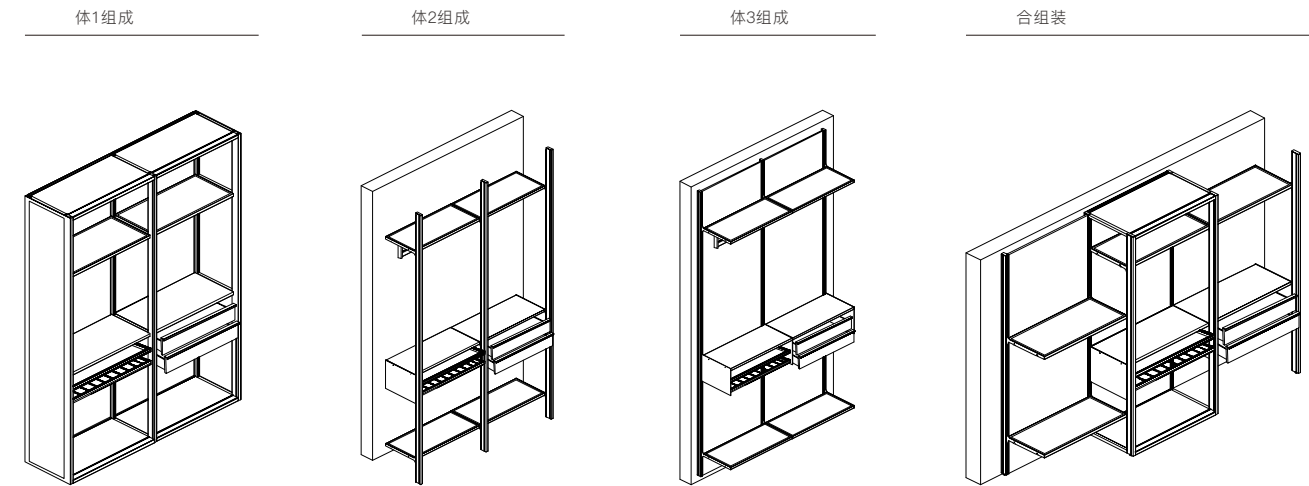

- (For Cabinet Type 1) Ari can be designed doorless or with doors. Compatible doors: Salice Series glass doors, Yasa Series glass doors, LK Series doors, Belling Series glass doors. Door width: 300mm ≤ W ≤ 550mm. Height = Cabinet height - 4mm. Note: Maximum Salice Series door size: 1.3㎡. Oversized doors require Heavy-Duty Salice Series.
- (For Hybrid Cabinet Type 1 & 2) Ari can be designed as open doorless cabinet or with doors. Compatible doors: Yasa Series glass doors, LK Series doors, Belling Series glass doors. Door width: 300mm ≤ W ≤ 550mm. Height = Cabinet height - 4mm.

产品说明:

铝框结构玻璃柜系统，其顶板、底板均为木板材质，侧板、背板可以选择木板材质和玻璃材质，整个柜子也可选择只有前立柱或者只有后立柱的开放式立柱挂臂系统，也可以两者搭配，即外侧栅为木板材质或玻璃材质，中间侧栅只有前立柱或者只有后立柱，打通了封闭式柜体与开放式柜体的壁垒，可以实现两者的无缝转换；铰链可以选择天地铰链、针式铰链、烟斗铰，可用于衣柜（衣帽间）、书柜、鞋柜、酒柜、餐边柜。

标准说明:

- ①高度：柜体高度2400mm≤H≤2800mm为标准高度,模块组件安装高度的位置可以客户需求定制；
- ②宽度：侧栅/中栅的宽度为25mm；两竖板之间的所有部件组成参考模块，模块的宽度以相邻两竖板的间距为准，单开门模块参考宽度有421mm/471mm/521mm，对开门模块参考模块宽864mm/964mm/1064mm；
- ③深度：衣柜的标准深度为550mm(不含门)，书柜/鞋柜/隔断的深度为350mm(不含门)；
- ④产品组成：按单元模块，产品可分为两部分：模块、竖板和门板(可选)；参考模块可分为：衣柜单门模块、衣柜双门模块、书柜单门模块、书柜双门模块；竖板组合可分为：(左侧栅、中侧栅、右侧栅)，或(前立柱)，或(后立柱)，或(左侧栅、前立柱、右侧栅)，或(左侧栅、后立柱、右侧栅)，或(前立柱、中侧栅、后立柱)；门板(可选)：萨利切系列门板、亚萨系列门板、LK系列门板、百灵门板。

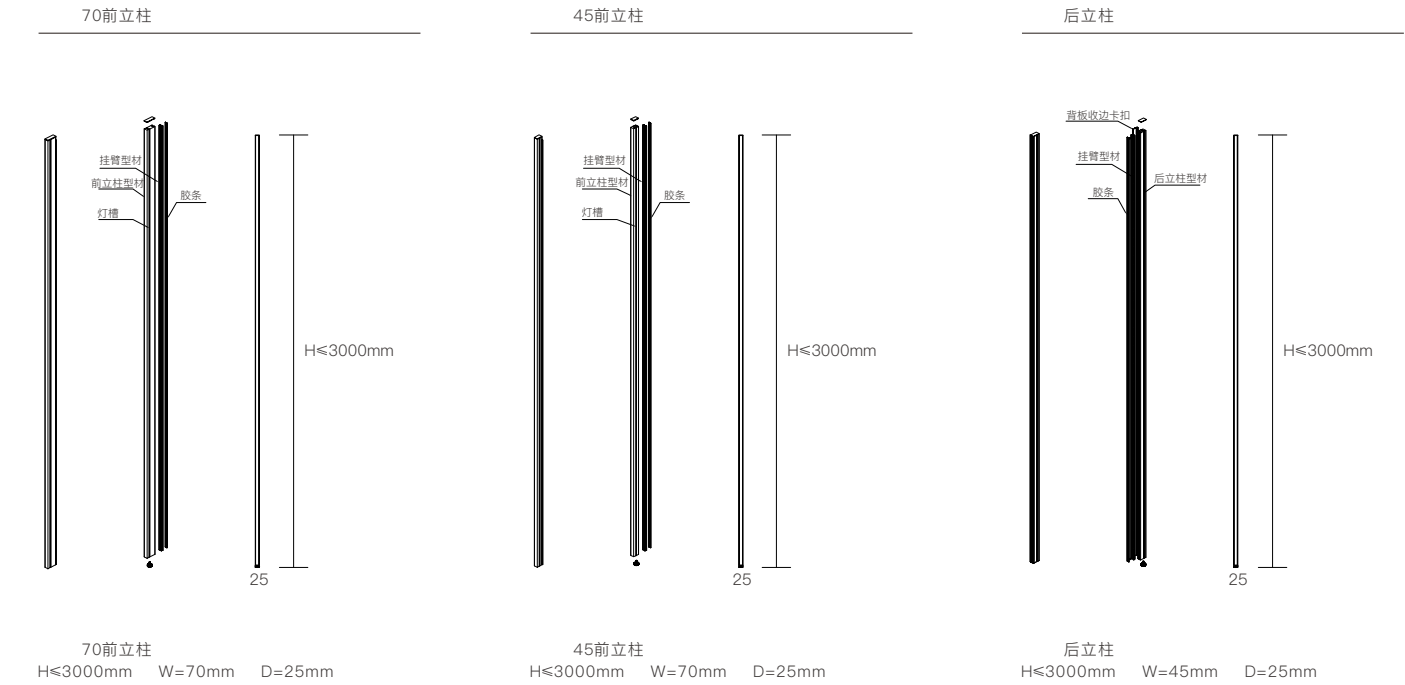

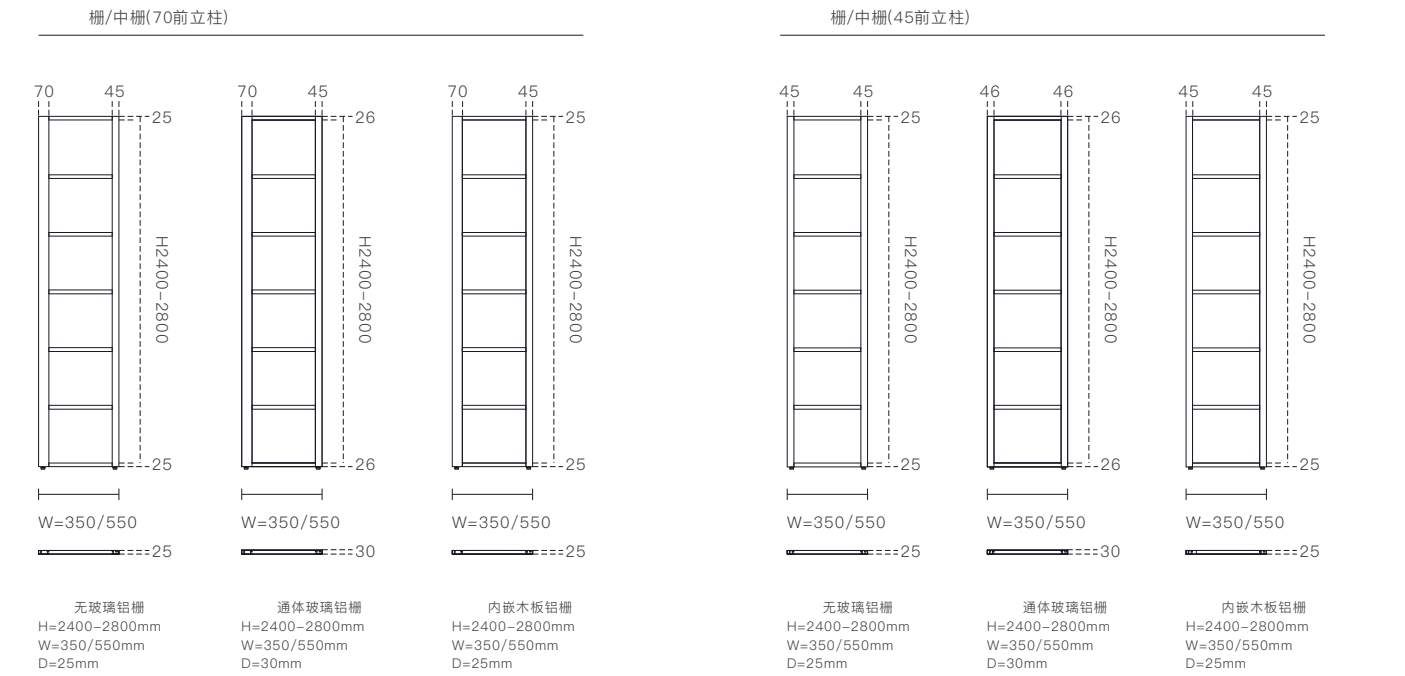

Product Specifications:

is an aluminum frame glass cabinet system. The top and base panels are made of wood. Side panels and back panels are available in either wood or glass. The cabinet can be configured with an open post hanging arm system featuring only front posts, only rear posts, or a combination of both. Side panels (outer sections) can be wood or glass, while the center side panel section utilizes either front posts only or rear posts only. This design bridges the gap between enclosed and open cabinet systems, enabling seamless transition between the two. Hinge options include top-and-bottom hinges, pin-type hinges, or concealed cup hinges. Suitable for wardrobes (walk-in closets), bookcases, shoe cabinets, wine cabinets, and sideboards.

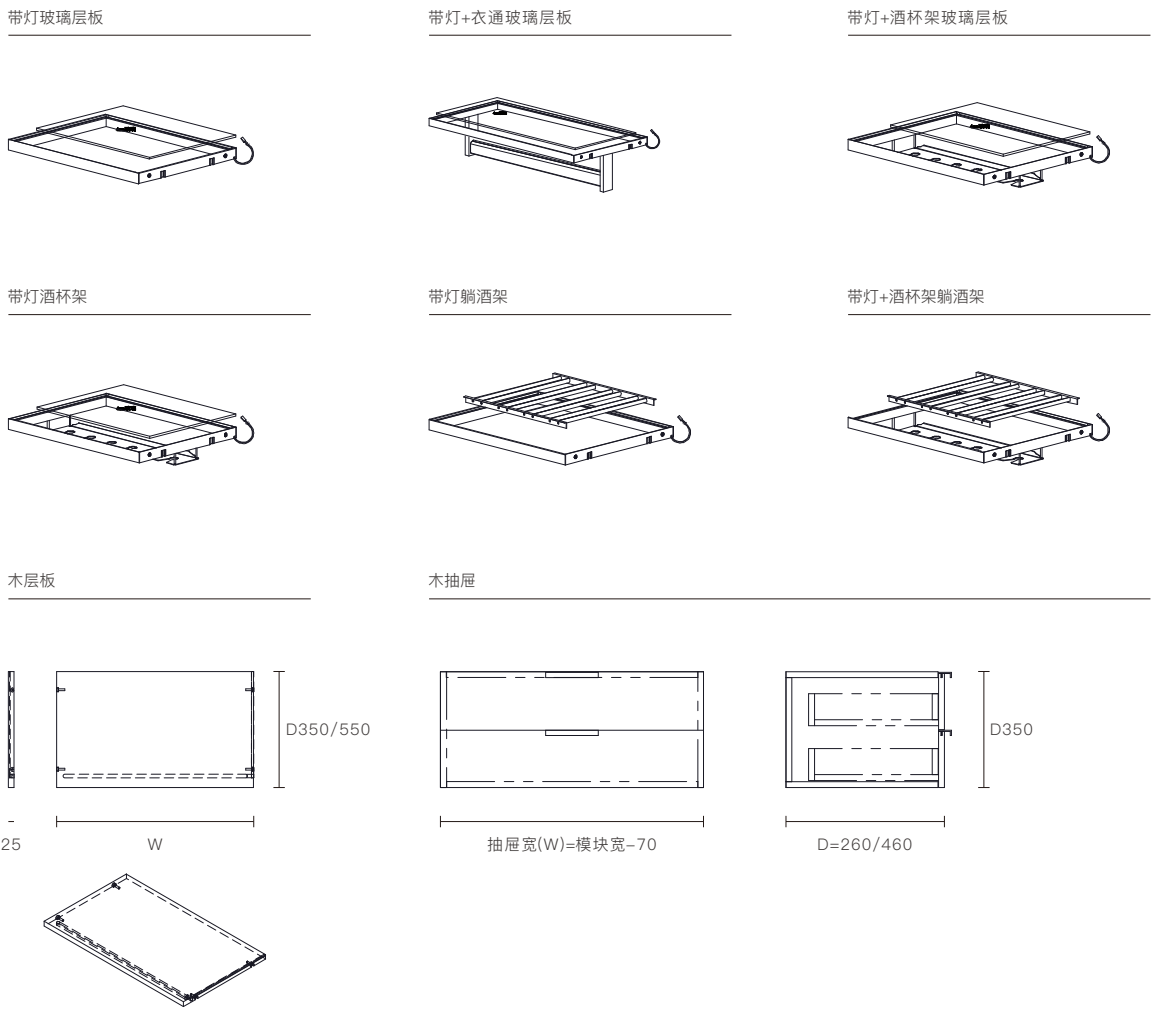

Standard Specifications:

- ① Height: Standard cabinet height is 2400mm ≤ H ≤ 2800mm. Installation height of module components can be customized per client requirements.
- ② Width: Side panel / Center panel width: 25mm. All components between two vertical panels constitute a reference module. Module width is determined by the distance between adjacent vertical panels. Single-door module reference widths: 421 mm / 471 mm / 521 mm. Double-door module reference widths: 864 mm / 964 mm / 1064 mm.
- ③ Depth: Standard wardrobe depth: 550mm (excluding door). Standard bookcase / shoe cabinet / partition depth: 350mm (excluding door).
- ④ Product Composition: By unit module, the product consists of two parts: Modules, Vertical Panels, and Door Panels (optional). Reference Modules: Wardrobe Single-door Module, Wardrobe Double-door Module, Bookcase Single-door Module, Bookcase Double-door Module. Vertical Panel Combinations: (Left Side Panel, Center Side Panel, Right Side Panel), or (Front Post), or (Rear Post), or (Left Side Panel, Front Post, Right Side Panel), or (Left Side Panel, Rear Post, Right Side Panel), or (Front Post, Center Side Panel, Rear Post). Door Panels (Optional): Salice Series Door Panel, Yasa Series Door Panel, LK Series Door Panel, Bailing Door Panel.
